3 Courses

Foundations of IoT Systems and Industrial Automation

Design Thinking for Human-Centered IoT Solutions

Advanced IoT Systems Integration and Industrial Applications

LearnQuest

Aug 9, 2024

Aaryan Choudhary

has successfully completed the online, non-credit Specialization

IoT Systems and Industrial Applications with Design Thinking

In this 3-course specialization, learners will dive into the world of IoT systems and their integration with Industrial Automation. This specialization also explores the design thinking process, emphasizing a user-centric approach through empathy, ideation, and prototyping. Lastly, learners will delve into cutting-edge advanced topics such as edge computing, analytics, security, and fusion of IoT with robotics and automation techniques.
